Dear Commissioner,

I appreciate all you do to help
each of us as consumers.

I am very concerned about Oleum
and the symptoms it can cause to all
people young & old and also those on
medications that cause similar conditions
which can be severe.

I hope you will continue to put
the label on foods containing Oleum.
I would like for a large label on the
front of the package so it can easily
be seen. A lot of mothers & dads & all
don't have a lot of time to spend reading
labels and this can cause a lot of
harm to children & their well being
each day.

Please keep the label on all
products containing Oleum and make
it very noticeable for the ones
who want it and don't want it. Let
the consumer have the choice by
looking at the label.

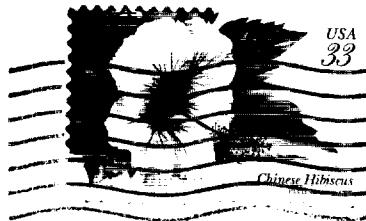

Thank you,

I'm asking by experience of Barbara Smith
what it did to me.
